DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: Claims 1,16 and 32 are identical claims. It is improper to have identical claims. Applicant is required to cancel or amend claims for correction.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9,12,13,16,17,20-26,29,32,38-44,47 rejected under 35 U.S.C. 103(a) as being unpatentable over Falciglia (5,935,002).

Falciglia teaches a gaming console having an electronic display (134), game control for displaying images (144), a first image (numbers) and a transparent second image (shaded) superimposed on the first image (2A-D), both images being on the same screen.

Image is broadly and reasonably interpreted as a symbol and shaded areas are symbols, however applicant might argue that the shaded areas on the matrix are not images.

Art Unit: 3711

Casinos and gaming houses use various symbols such as fruits, playing cards and other Images and symbols to attract players.

In order to attract players, it would have been obvious to use any kind of image including images commonly used by casinos. One of ordinary skill in art at the time the invention was made would have suggested various images as desired to attract players. Applicant may note that limitations indicating intended use of a game does not add any limitation to the apparatus in the claim, for example: "component used to indicate a feature game, special prize, a message etc."

4. Claims 10,11,14,15,18,19,27,28,30,31,33-37,45,46,48,49 rejected under 35

U.S.C. 103(a) as being unpatentable over Falciglia in view of Bennett (6,089,977).

Falciglia teaches all limitations except that it does not teach the second symbol moving around the screen.

Bennett teaches symbols moving on screen (abstract).

Casinos and gaming houses use animation techniques for various moving symbols such as card members or penguins as demonstrated by Bennett to attract players.

In order to attract players, it would have been obvious to use animation techniques commonly used by casinos. One of ordinary skill in art at the time the invention was made would have suggested various imaging techniques including animation to attract players.

Response to Arguments

5. Applicant's arguments with respect to claims 1-49 have been considered but are moot in view of the new ground(s) of rejection.
